

ABOUT US

ONE OF THE LEADING M&E CONTRACTORS IN DENMARK

Wicotec Kirkebjerg A/S (WK) is one of the leading M&E contractors in Denmark.

WK offers technical solutions including service and Facility Management across a comprehensive range of technical disciplines. Our core strengths are in multidisciplinary contracts. WK is a reliable partner. We ensure responsible practice in technical contracts and we take the total system responsibility for the interdisciplinary services in turnkey contracts.

WK has a broad range of well experienced and highly qualified employees consisting of engineers, project managers, site managers, technicians and administrative staff undertaking all technical disciplines as a core competence. Our core business covers technical solutions comprising:

- Electrical and Mechanical Services
- Piping and Plumbing Services
- HVAC Services
- District Heating
- Fire and Protection
- Building Automation
- Service & Maintenance

WKs organisation has a cross-disciplinary and collaborating structure with the capacity and knowledge to participate in the entire life cycle from design, planning, installation, operation to service and maintenance.

WK is, as a part of the Per Aarsleff Group, a well-consolidated Danish contractor. Together with the Group, WK offers turnkey solutions in a One Company concept. One Company is a Group strategic approach that combines construction and technical services into a fully integrated turnkey contract through a cross-functional cooperation and operation within the Group.

AREA OF EXPERTISE

WK is always at the forefront of our industry taking advantage of the technological development. We are strongly represented across a wide range of industries. Our area of expertise covers the following segments:

- Hospitals
- Pharmaceuticals
- Education & Research
- Energy Supply and District Heating
- Infrastructure
- Commercial- and Residential Buildings

WK is highly engaged in Public Private Partnership (PPP) turnkey contracts where operations and maintenance are an integrated part of a total life cycle approach. WK offers Facility Management as an integrated part of the PPP projects.

Our Facility Management agreements are long term with a span from 10 to 30 years. The agreements are managed by our web-based IT system and include efficient preventive- and corrective maintenance. Our Facility Management system covers all technical disciplines including water, heat, refrigeration, ventilation, electricity and automation together with energy optimization and soft services.

QUALITY, HEALTH, SAFETY & ENVIRONMENT

WK has a high commitment to Quality, Health, Safety and Environment (QHSE) and we strive to continuously improve our activities within our Quality Management System. WK is committed to achieve the highest quality standards. Our company is ISO certified and we hold the following certifications:

- DS/EN ISO 9001:2008, Quality Management
- DS/OHSAS 18001:2008, Occupational Health and Safety Management
- DS/EN ISO 14001:2004, Environmental Management

Our business partners and subcontractors are contractually required to comply with our high quality standards. It is of utmost importance to our company that we operate within known procedures and internationally recognized standards throughout our value chain.
